

EXPLORE ART

Soon you will experience VR (virtual reality) in the Evoluon in our VR Time Machine. You will travel through time to the distant future of our solar system. In this assignment you will start by imagining your own time travel. Maybe you go backwards? Or do you look ahead when you time travel?

The following questions will help you think about time travel.

- Have you ever made a journey forward in time or to the past?
- What is your favorite destination in time to travel to?
- What do you need for this time travel?
- What does time travel offer you?
- Would you like to change things over time?
- What do you know about your own timeline?
- How would you imagine or express time travel?

***Assignment: What does time travel look like for you?
Make a mood board, painting, comic strip, video, song, performance or choose another creative way.***
