

EXPLORE SCIENCE

Soon you will experience VR (virtual reality) in the Evoluon in our VR Time Machine. You will travel through time to the distant future of our solar system. With this assignment, you are going to explore research around this topic and make an infographic about the end of our solar system. Choose one of the following scenarios: The Big Freeze, the Big Rip or the Big Crunch.

The following questions will help you think about the distant future of our solar system.

- What could the Earth look like in three generations?
- To provide for future energy needs, science explores the Dyson Sphere. Research what that is and consider do you think this is a realistic scenario?
- If we look to the distant future, humanity may face a number of possible events. Investigate one of the following scenarios: The Big Freeze, the Big Rip or the Big Crunch.
- Do you think your chosen scenario is realistic?

Assignment: make an infographic of one of the scenarios.

The inspirational videos on the Next Nature Future Travels website can help you with your research. You will shape your research in an infographic. An infographic is a graphical and visual representation of information. Instead of a lot of text, illustrations and pictures are used to inform quickly and clearly. Design an infographic about one of the studied scenarios. You can find great examples of infographics online.
